

## Cooling Industry Award winners

CCS Refrigeration and Air Conditioning have been selected as winners for their work at the Emirates Stadium in the prestigious Cooling Industry awards held at the Royal Lancaster Hotel in London.

With their work for Emirates Stadium short listed, CCS Refrigeration and Air Conditioning won the 'Installation of the Year' award for refrigeration installations in Industrial and commercial applications.

Director Paul Thomas commented "We are delighted to have won this prestigious award, the judging panel is made up of the industry's leading figures so for our work to be recognised is a real honour. The award is for the whole team here at CCS, from our administration staff through to our project managers and on site engineers, every single person contributed to the huge success of Emirates Stadium."

The cooling Industry awards recognise and reward the achievements of those pushing forward the boundaries of environmentally focused refrigeration and air conditioning. "The award is not only based on the quality of the installation but predominantly the judges were looking for how we had ensured the project was environmentally friendly, this is paramount in moving forward on refrigeration design." Fellow Director, David Blinkhorn.

CCS Refrigeration and Air Conditioning with offices in Cumbria and Kent have grown rapidly over the past seven years undertaking projects for many restaurants, hotels and stadiums, providing project management, refrigeration design and installation as well as after sales service to exceptional standards as proven by these awards.

Director Paul Thomas commented "CCS is a relatively new company and to have reached these heights already is a testament to the great team we have around us. We have recently completed similar projects at Wembley Arena, Coventry Stadium and O2 Arena and hope to retain this award next year."

Electronic and printed images of the event and the projects are available on request.

Information: CCS Refrigeration & Air Conditioning Ltd are a national refrigeration contractor with offices in Cumbria and Kent. With teams of engineers located throughout the UK, they offer a national service. The companies growing and varied client base covers a wide selection of market sectors including restaurants, hotels, stadiums and many more. As one of the few remaining independent companies within the industry CCS Refrigeration & Air conditioning are able to offer independent advice ensuring the best solution. CCS were awarded the Emirates Stadium project by KCCJ who were responsible for the supply of all catering facilities at the stadium.
